SUMMARY

I am a software developer with 1 year of professional experience backed by 3 years of dedicated study and hands-on practice. I'm always eager to learn, and my social skills enhance team communication and collaboration.

SKILLS

Programming Languages: HTML, CSS, Javascript, Typescript, Node.js, PHP.

Frameworks: React.js, Vue.js, Express.js, Laravel

Databases: MySQL, PostgreSQL, MongoDB, Firebase

Project Management: Jira, Trello

Front End Styling: TailwindCSS, Sass, Bootstrap

Additional tools and libraries: Git, GitHub, Docker, Redux, React Router, JWT, Yup, Figma

EXPERIENCE

Invisible Geeks, Madrid - Full Stack Developer

September 2024-March 2025

Responsibilities:

- **Frontend Developer:** Implemented the complete frontend functionality and navigation of the app. Developed reusable components to improve maintainability and scalability.
- **Server-side Development:** Built the backend of the application using Laravel (MVC), including models, views, and controllers to handle application logic, database interactions, and API endpoints.
- **Version Control & Collaboration:** Participated in agile development processes including sprint planning and daily stand-ups.

Publicis Groupe, Buenos Aires - Full Stack Developer

March 2024-September 2024

Responsibilities:

- **Frontend Developer:** Developed web applications. Translated UX/UI designs into responsive interfaces and implemented reusable components to ensure consistency and scalability.
- **Server-side Development:** Designed and created databases and built backend functionality using the MVC pattern. Developed models, controllers, and API endpoints to manage business logic and data flow.

EDUCATION

Escuela Da Vinci, Buenos Aires - Associate Degree in Web Design and Development
